integration**

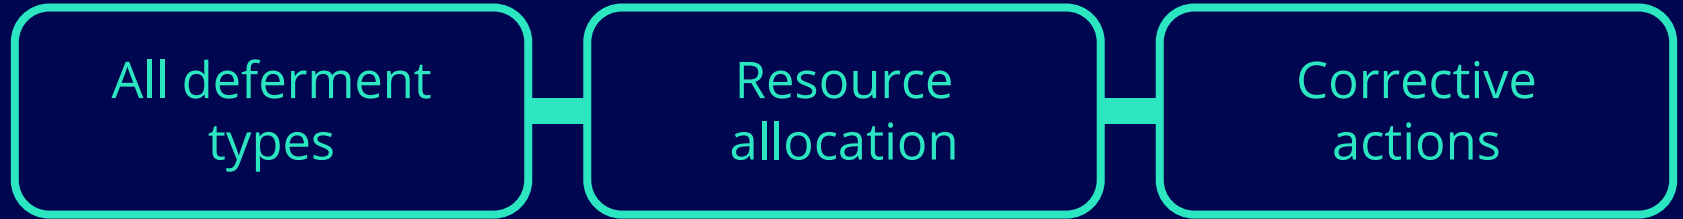

Kenneth Nguyen

Tasq is a holistic optimization platform that connects operations.

Tasq is a **holistic** optimization platform that connects operations.

Tasq is a holistic optimization platform that connects operations.

We believe production operations shouldn't be as hard as it is today.

**Low data
utilization**

**Not learning
from ops**

**Unlinked
technology**

**We see an opportunity to build
connected intelligence in our industry.**

Currently, the market solutions are:

**Digital
Forms**

Workflow

**Intelligent
Control**

Digital Forms

What work was completed

Tasq
connects
each silo

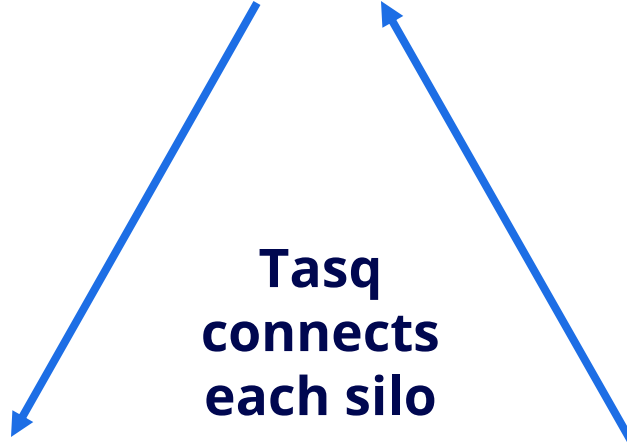

Well Sensors

What work needs
to be done

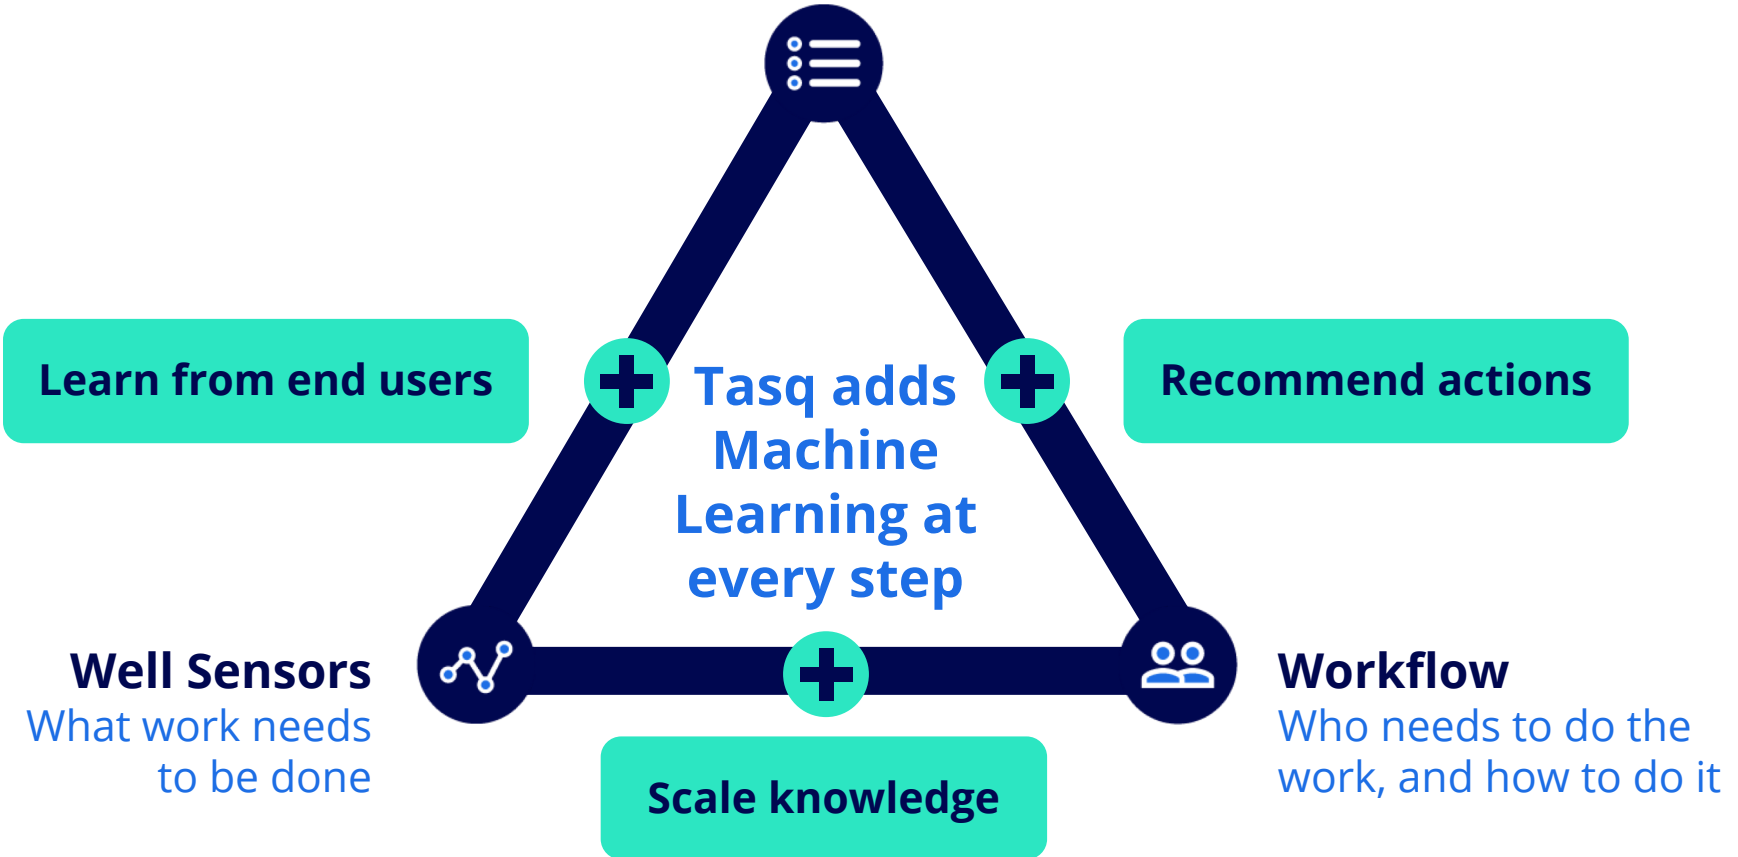

Workflow

Who needs to do the
work, and how to do it

Digital Forms

What work was completed

**Reduce cycle
times**

**Corrective
action uplift**

**Optimize field
resources**

We see a need for technology in the market, which also means a big opportunity for return.

~269K

Available
wells
